Answer Key

Topic 1: Continents and Their Wildlife

Passage 1: Wildlife of the African Savanna

1. B
2. (Open response)

   Sample answer: Migration means a large, seasonal journey animals make, usually in search of food or water, such as the wildebeest traveling across the Serengeti.

3. B (False)
4. C
5. A, B, D
6. A
7. B
8. (Open response)

   Sample answer: They were created to protect savanna ecosystems and wildlife migration routes from being lost to farming, cities, and roads.

9. A (True)
10. D
11. (Open response)

    Sample answer: Human activity like farming and roads has reduced space for wildlife, so countries have created national parks and reserves to protect the animals.

12. A, B, D

Topic 1: Continents and Their Wildlife

Passage 2: The Amazon Rainforest: Life in South America

1. B
2. (Open response)

   Sample answer: Warning coloration means bright colors that signal danger to predators, warning them that an animal is toxic or harmful to eat.

3. B (False)
4. C
5. A, C, D
6. B
7. B
8. (Open response)

   Sample answer: The Amazon helps produce oxygen and absorb carbon dioxide, which affects the whole planet's air, not just the local ecosystem.

9. A (True)
10. D
11. (Open response)

    Sample answer: Answers will vary. A strong answer names an animal (jaguar, pink dolphin, or poison dart frog) and explains using a specific detail from the passage.

12. A, B, C

Topic 1: Continents and Their Wildlife

Passage 3: Australia's Unusual Marsupials

1. B
2. (Open response)

   Sample answer: Isolation means being separated or cut off from other places, which is why Australia's animals developed differently from animals elsewhere.

3. B (False)
4. C
5. A, B, D
6. B
7. B
8. (Open response)

   Sample answer: A marsupial is a mammal that carries and nurses its young in a pouch; examples from the passage include kangaroos, koalas, and Tasmanian devils.

9. A (True)
10. D
11. (Open response)

    Sample answer: Answers will vary. A strong answer names one marsupial and gives a reason connected to a detail from the passage.

12. A, B

Topic 1: Continents and Their Wildlife

Passage 4: Survivors of the Arctic and Antarctic

1. B
2. (Open response)

   Sample answer: Blubber is a thick layer of fat that helps keep polar bears warm in extremely cold temperatures.

3. B (False)
4. C
5. A, B, D
6. B
7. B
8. (Open response)

   Sample answer: Krill are at the base of the food chain, so if their numbers shrink, the animals that eat them — and the animals that eat those animals — could also struggle to find food.

9. A (True)
10. D
11. (Open response)

    Sample answer: Answers will vary. A strong answer names a specific adaptation and explains why it helps the animal survive extreme cold using a detail from the passage.

12. A, B, D

Topic 2: Events from the Early 21st Century

Passage 5: Mapping the Human Genome

1. B
2. (Open response)

   Sample answer: Personalized medicine means treatment designed around a specific person's genetic makeup, rather than the same treatment being used for everyone.

3. B (False)
4. C
5. A, B, D
6. B
7. B
8. (Open response)

   Sample answer: Both are seen as major scientific milestones that opened the door to new discoveries and changed what scientists thought was possible.

9. A (True)
10. B
11. (Open response)

    Sample answer: Answers will vary. A strong answer connects to an idea from the passage, such as targeting treatments to a person's specific genes.

12. A, B, D

Topic 2: Events from the Early 21st Century

Passage 6: The Smartphone Revolution

1. B
2. (Open response)

   Sample answer: Apps are small programs designed for specific tasks, like games, weather, or banking, that people can download onto their smartphones.

3. A (True)
4. D
5. A, B, C
6. B
7. B
8. (Open response)

   Sample answer: Built-in cameras improved so much that people stopped needing separate cameras, and social media apps let people instantly share photos with others.

9. B (False)
10. D
11. (Open response)

    Sample answer: Answers will vary. A strong answer connects a personal observation to a detail from the passage, such as instant photo sharing or app stores.

12. A, B, D

Topic 2: Events from the Early 21st Century

Passage 7: The Rise of Social Media

1. B
2. (Open response)

   Sample answer: Misinformation means incorrect or false information that spreads, especially before it can be checked or corrected.

3. B (False)
4. C
5. A, B, C
6. B
7. B
8. (Open response)

   Sample answer: People could share updates instantly with their whole network instead of waiting for newspapers or TV, which had both benefits and downsides.

9. A (True)
10. D
11. (Open response)

    Sample answer: Positive: it helps spread safety information quickly. Negative: it can also spread incorrect information before it is checked.

12. A, B, C

Topic 2: Events from the Early 21st Century

Passage 8: New Horizons: A Journey to Pluto

1. B
2. (Open response)

   Sample answer: A gravity assist is a technique where a spacecraft swings past a planet to gain extra speed using that planet's gravity, saving travel time.

3. B (False)
4. D
5. A, B, D
6. A
7. B
8. (Open response)

   Sample answer: Scientists expected Pluto to be a simple, inactive world, but instead found ice mountains, a heart-shaped plain, and signs of geological activity.

9. A (True)
10. C
11. (Open response)

    Sample answer: Answers will vary. A strong answer names a detail from the passage, such as the nine-year journey or the discoveries on Pluto, and explains why it stands out.

12. A, B, C

Topic 3: Earth's Natural Phenomena

Passage 9: Volcanoes: Windows into Earth's Interior

1. B
2. (Open response)

   Sample answer: Magma is melted rock found deep beneath Earth's surface that can rise and erupt from a volcano.

3. B (False)
4. D
5. A, B, C
6. A
7. B
8. (Open response)

   Sample answer: Scientists use instruments to detect small earthquakes, changes in ground shape, and gas releases, which can signal an eruption may be coming.

9. A (True)
10. D
11. (Open response)

    Sample answer: Volcanoes offer a glimpse into materials from deep inside the Earth, helping scientists understand the planet's interior.

12. A, B, C

Topic 3: Earth's Natural Phenomena

Passage 10: Earthquakes: When the Ground Shakes

1. B
2. (Open response)

   Sample answer: The epicenter is the point on Earth's surface directly above where an earthquake starts underground.

3. B (False)
4. D
5. A, B, C
6. A
7. B
8. (Open response)

   Sample answer: It has many tectonic plate boundaries, and movement along those boundaries causes both earthquakes and volcanic activity.

9. A (True)
10. D
11. (Open response)

    Sample answer: Answers will vary. A strong answer references a detail from the passage, such as magnitude measurement or early warning systems.

12. A, B, D

Topic 3: Earth's Natural Phenomena

Passage 11: The Northern and Southern Lights

1. B
2. (Open response)

   Sample answer: Solar wind is a stream of charged particles released by the sun that travels through space toward Earth.

3. B (False)
4. C
5. A, B, C
6. B
7. B
8. (Open response)

   Sample answer: Strong auroras can signal intense solar activity that may interfere with satellites, power grids, and radio communications on Earth.

9. A (True)
10. D
11. (Open response)

    Sample answer: Answers will vary. A strong answer names a specific detail, such as the colors or the sun's connection to the aurora, and explains why it stands out.

12. A, B, C

Topic 3: Earth's Natural Phenomena

Passage 12: Tornadoes: Nature's Most Violent Storms

1. B
2. (Open response)

   Sample answer: A mesocyclone is a rotating updraft of air inside a supercell thunderstorm that can lead to tornado formation.

3. B (False)
4. D
5. A, B, D
6. A
7. B
8. (Open response)

   Sample answer: A watch means conditions suggest a tornado is possible, while a warning means one has actually been spotted or detected, requiring immediate shelter.

9. A (True)
10. D
11. (Open response)

    Sample answer: Answers will vary. A strong answer connects to the passage's point that tornadoes form quickly and unpredictably, so knowing what to do saves time.

12. A, B, C

Topic 4: Evolution of Video Games

Passage 13: The Arcade Era: Video Games Begin

1. B
2. (Open response)

   Sample answer: Coin-operated means a machine that requires inserting a coin to work or to keep playing, which is how arcade games charged players.

3. B (False)
4. D
5. A, B, C
6. B
7. C
8. (Open response)

   Sample answer: Since players paid coin by coin, games were made hard enough that players would lose and need to pay again to keep playing.

9. A (True)
10. D
11. (Open response)

    Sample answer: Answers will vary. A strong answer connects to ideas from the passage, such as scoring systems or levels that came from the arcade era.

12. A, B, D

Topic 4: Evolution of Video Games

Passage 14: Video Games Come Home

1. B
2. (Open response)

   Sample answer: The video game crash was a period when the industry struggled badly, as too many low-quality games caused companies to fail and shoppers to lose trust.

3. B (False)
4. D
5. A, B, C
6. A
7. B
8. (Open response)

   Sample answer: Today's consoles let players compete with people worldwide, download games instantly, and receive updates, none of which the earliest consoles could do.

9. A (True)
10. D
11. (Open response)

    Sample answer: Answers will vary. A strong answer names a specific change, like saving progress or online play, and explains its impact using the passage.

12. A, B, C

Topic 4: Evolution of Video Games

Passage 15: Entering the Third Dimension

1. B
2. (Open response)

   Sample answer: Cutscenes are short, movie-like segments in a video game used to help tell the story between sections of actual gameplay.

3. B (False)
4. D
5. A, B, C
6. A
7. B
8. (Open response)

   Sample answer: Games began requiring large teams and big budgets similar to movies, as 3D worlds and complex storytelling made development more like film production.

9. A (True)
10. D
11. (Open response)

    Sample answer: Answers will vary. A strong answer names one change from the passage and explains why it mattered most, using a specific detail.

12. A, B, D

Topic 4: Evolution of Video Games

Passage 16: Gaming Goes Mobile and Global

1. A
2. (Open response)

   Sample answer: Esports are organized video game competitions where skilled players compete for prize money in front of live or online audiences.

3. B (False)
4. D
5. A, B, C
6. A
7. B
8. (Open response)

   Sample answer: Faster internet let players compete or team up with people anywhere in the world in real time, making gaming a shared, global activity.

9. A (True)
10. D
11. (Open response)

    Sample answer: Answers will vary. A strong answer connects to a trend mentioned in the passage, such as virtual reality, and describes a reasonable prediction.

12. A, B, C

Topic 5: Astronomy and Astronomical Events

Passage 17: Our Solar System's Family of Planets

1. B
2. (Open response)

   Sample answer: Terrestrial likely means having a solid, rocky surface similar to Earth's ground, as opposed to being made mostly of gas.

3. B (False)
4. D
5. A, B, D
6. A
7. C
8. (Open response)

   Sample answer: Terrestrial planets have solid, rocky surfaces, while gas giants are made mostly of gas and have no solid surface to stand on.

9. A (True)
10. D
11. (Open response)

    Sample answer: Answers will vary. A strong answer names a planet or object and gives a reason connected to a detail from the passage.

12. A, B, C

Topic 5: Astronomy and Astronomical Events

Passage 18: When Day Turns to Night: Solar and Lunar Eclipses

1. B
2. (Open response)

   Sample answer: The corona is the sun's outer atmosphere, which becomes visible as a glowing ring around the sun during a total solar eclipse.

3. B (False)
4. D
5. A, B, C
6. B
7. C
8. (Open response)

   Sample answer: The moon's shadow during a solar eclipse only covers a narrow area on Earth, but Earth's shadow during a lunar eclipse covers the whole nighttime side.

9. A (True)
10. D
11. (Open response)

    Sample answer: Answers will vary. A strong answer references a specific detail, such as the corona during a solar eclipse or the reddish moon during a lunar eclipse.

12. A, C, D

Topic 5: Astronomy and Astronomical Events

Passage 19: Stars and the Patterns We See

1. B
2. (Open response)

   Sample answer: Nebulae are massive clouds of gas and dust in space where stars are born.

3. B (False)
4. C
5. A, B, D
6. B
7. B
8. (Open response)

   Sample answer: Different cultures imagined different shapes and stories in the same star patterns, creating their own names and meanings for the constellations.

9. A (True)
10. D
11. (Open response)

    Sample answer: Answers will vary. A strong answer connects to an idea from the passage, such as how stars form, their colors, or their distances.

12. A, B, D

Topic 5: Astronomy and Astronomical Events

Passage 20: Comets and Meteor Showers

1. B
2. (Open response)

   Sample answer: A meteorite is a piece of debris from space that survives the trip through Earth's atmosphere and lands on the ground.

3. B (False)
4. D
5. A, B, C
6. A
7. B
8. (Open response)

   Sample answer: Some meteorites are older than any rock on Earth's surface, giving scientists clues about the materials present when the solar system first formed.

9. A (True)
10. D
11. (Open response)

    Sample answer: Answers will vary. A strong answer references a detail from the passage, such as seeing dozens of meteors per hour in a dark location.

12. A, B

Topic 6: Societal Structure

Passage 21: How Societies Organize Their People

1. B
2. (Open response)

   Sample answer: Social structure means how a society organizes people into different groups or levels, which affects their jobs, rights, and responsibilities.

3. A (True)
4. D
5. A, B, C
6. A
7. B
8. (Open response)

   Sample answer: It helps them explain why some groups had more opportunities than others and why certain inequalities have continued into the present.

9. A (True)
10. D
11. (Open response)

    Sample answer: Answers will vary. A strong answer references the passage's point that rigid structures limited education, marriage, and career based only on family.

12. A, B, C

Topic 6: Societal Structure

Passage 22: Types of Government Around the World

1. B
2. (Open response)

   Sample answer: Representative means citizens elect people to make decisions and laws on their behalf, rather than every citizen voting on every law directly.

3. B (False)
4. D
5. A, B, C
6. A
7. B
8. (Open response)

   Sample answer: In an absolute monarchy, the monarch holds nearly complete power, while in a constitutional monarchy, the monarch's power is limited and elected officials handle most governing.

9. A (True)
10. D
11. (Open response)

    Sample answer: Answers will vary. A strong answer names a government type from the passage and explains the reasoning using a specific detail.

12. A, B, C

Topic 6: Societal Structure

Passage 23: Why Societies Need Laws and Rules

1. B
2. (Open response)

   Sample answer: Social norms are unwritten expectations about polite or appropriate behavior that people generally follow, even without a formal law requiring it.

3. B (False)
4. D
5. A, B, C
6. B
7. A
8. (Open response)

   Sample answer: A formal law is written and enforced by courts with serious consequences, while a social norm, like waiting in line, is unwritten and enforced through social disapproval.

9. A (True)
10. D
11. (Open response)

    Sample answer: Answers will vary. A strong answer names a real social norm and connects it to the passage's idea of avoiding social disapproval.

12. A, B, C

Topic 6: Societal Structure

Passage 24: Trade, Money, and Economic Systems

1. B
2. (Open response)

   Sample answer: Bartering means directly trading one good or service for another without using money as currency.

3. B (False)
4. D
5. A, B, C
6. B
7. B
8. (Open response)

   Sample answer: A mixed economic system combines elements of both market-based and centrally planned systems, allowing businesses to operate freely while the government still sets rules and provides services.

9. A (True)
10. D
11. (Open response)

    Sample answer: Answers will vary. A strong answer references a detail from the passage, such as the double coincidence of wants problem with bartering.

12. A, B, C

Topic 7: Modern World History — the 1900s

Passage 25: The Roaring Twenties

1. B
2. (Open response)

   Sample answer: Prosperity likely means a period of economic success and growth, when many people had more money and opportunity than before.

3. A (True)
4. D
5. A, B, C
6. A
7. B
8. (Open response)

   Sample answer: The crash ended the prosperity of the Roaring Twenties and led directly into a long period of economic hardship in the following decade.

9. B (False)
10. D
11. (Open response)

    Sample answer: Answers will vary. A strong answer names one change from the passage and explains its impact using a specific detail.

12. A, B, C

Topic 7: Modern World History — the 1900s

Passage 26: The Civil Rights Movement

1. B
2. (Open response)

   Sample answer: Segregation means the forced separation of people by race in public places, which was enforced by law in some states.

3. B (False)
4. D
5. A, B, C
6. A
7. B
8. (Open response)

   Sample answer: Even though new laws were passed, putting equal treatment into practice in everyday life remained an ongoing struggle beyond just changing the laws.

9. A (True)
10. D
11. (Open response)

    Sample answer: Answers will vary. A strong answer connects to the passage's point that nonviolent protest drew attention to injustice without escalating violence.

12. A, B, C

Topic 7: Modern World History — the 1900s

Passage 27: The Space Race

1. B
2. (Open response)

   Sample answer: Rivalry means an intense competition between two sides, in this case the United States and the Soviet Union competing over space achievements.

3. A (True)
4. C
5. A, B, C
6. A
7. B
8. (Open response)

   Sample answer: The intense competition eventually cooled down and led to cooperation between countries on projects like international space stations.

9. A (True)
10. D
11. (Open response)

    Sample answer: Answers will vary. A strong answer names a specific milestone, such as the Moon landing or the first satellite, and explains why it stands out.

12. A, B, C

Topic 7: Modern World History — the 1900s

Passage 28: The Fall of the Berlin Wall

1. B
2. (Open response)

   Sample answer: Reunification means bringing two separated parts back together into one, in this case East and West Germany becoming a single country again.

3. A (True)
4. D
5. A, B, C
6. A
7. A
8. (Open response)

   Sample answer: The wall had long represented the division between Western and Soviet-aligned countries, so its fall showed that this long-standing division was ending.

9. A (True)
10. D
11. (Open response)

    Sample answer: Answers will vary. A strong answer names one part of the passage and explains its significance using a specific detail.

12. A, B, D

Topic 8: Dinosaurs and Ancient Animals

Passage 29: Tyrannosaurus Rex: King of the Predators

1. B
2. (Open response)

   Sample answer: A scavenger is an animal that mainly eats animals that are already dead, rather than hunting and killing its own prey.

3. B (False)
4. D
5. A, B, C
6. A
7. B
8. (Open response)

   Sample answer: Its massive body size made extremely fast running physically risky, so most estimates suggest a moderate speed of ten to twenty-five miles per hour.

9. A (True)
10. D
11. (Open response)

    Sample answer: Answers will vary. A strong answer names a specific detail, such as the small arms or the bite force, and explains why it stands out.

12. A, B, C

Topic 8: Dinosaurs and Ancient Animals

Passage 30: The Long-Necked Giants: Sauropods

1. B
2. (Open response)

   Sample answer: Gastroliths are swallowed stones that helped grind up tough plant matter inside a sauropod's stomach.

3. B (False)
4. C
5. A, B, C
6. A
7. A
8. (Open response)

   Sample answer: Trackways show multiple sauropods of similar sizes moving together in the same direction, suggesting they traveled as a group.

9. A (True)
10. C
11. (Open response)

    Sample answer: Answers will vary. A strong answer names a specific adaptation, such as the long neck or lightweight bones, and explains its importance.

12. A, B, C

Topic 8: Dinosaurs and Ancient Animals

Passage 31: Woolly Mammoths and the Ice Age

1. B
2. (Open response)

   Sample answer: Insulation means something that helps keep heat in and cold out, like the fat layer that helped mammoths stay warm.

3. B (False)
4. D
5. A, B, C
6. A
7. B
8. (Open response)

   Sample answer: Early humans hunted mammoths for meat and fur, and sometimes used their bones to build shelters where wood was scarce.

9. A (True)
10. C
11. (Open response)

    Sample answer: Answers will vary. A strong answer references a detail from the passage, such as frozen remains or cave paintings.

12. A, B, C

Topic 8: Dinosaurs and Ancient Animals

Passage 32: Rulers of the Ancient Skies and Seas

1. B
2. (Open response)

   Sample answer: Convergent evolution means unrelated animals independently developing similar features because they face similar environmental challenges.

3. B (False)
4. C
5. A, B, C
6. A
7. B
8. (Open response)

   Sample answer: Convergent evolution is when unrelated animals develop similar features due to similar challenges; ichthyosaurs and dolphins developed similar body shapes despite not being closely related.

9. A (True)
10. C
11. (Open response)

    Sample answer: Answers will vary. A strong answer names one animal group from the passage and explains the choice using a specific detail.

12. A, B, C

Topic 9: Major Scientific Discoveries

Passage 33: Newton and the Force of Gravity

1. B
2. (Open response)

   Sample answer: Mass means the amount of matter an object contains, which affects how strongly gravity pulls on it.

3. B (False)
4. C
5. A, B, C
6. A
7. B
8. (Open response)

   Sample answer: Newton's equations remain accurate enough for most ordinary situations and even most spaceflight calculations, even though Einstein's theory explains extreme cases better.

9. A (True)
10. C
11. (Open response)

    Sample answer: Answers will vary. A strong answer references a detail from the passage, such as the apple story or the mathematical relationship.

12. A, B, C

Topic 9: Major Scientific Discoveries

Passage 34: Pasteur and the Discovery of Germs

1. B
2. (Open response)

   Sample answer: Germ theory is the scientific idea that diseases are caused by microorganisms that spread from other microorganisms, rather than appearing from nowhere.

3. A (True)
4. D
5. A, B, D
6. A
7. B
8. (Open response)

   Sample answer: Pasteur showed that microorganisms came from other microorganisms already present, rather than appearing out of nowhere in decaying material, as many scientists previously believed.

9. A (True)
10. D
11. (Open response)

    Sample answer: Answers will vary. A strong answer connects to the passage's point about saving lives through improved hygiene, food safety, and vaccines.

12. A, B, C

Topic 9: Major Scientific Discoveries

Passage 35: Darwin and the Theory of Evolution

1. B
2. (Open response)

   Sample answer: Natural selection is the process by which traits that help individuals survive and reproduce become more common in a population over time.

3. B (False)
4. D
5. A, B, C
6. A
7. B
8. (Open response)

   Sample answer: Individuals with traits that help them survive and reproduce pass those traits on more often, so helpful traits become more common over many generations.

9. A (True)
10. D
11. (Open response)

    Sample answer: Answers will vary. A strong answer connects to the passage's point about noticing different features among similar species on different islands.

12. A, B, C

Topic 9: Major Scientific Discoveries

Passage 36: Discovering the Structure of DNA

1. B
2. (Open response)

   Sample answer: A double helix is a twisted ladder shape made of two long connected strands, which is the structure of DNA.

3. B (False)
4. D
5. A, B, C
6. A
7. B
8. (Open response)

   Sample answer: Her X-ray images provided crucial evidence for the discovery, but she received far less public credit than she deserved for many years.

9. A (True)
10. D
11. (Open response)

    Sample answer: Answers will vary. A strong answer names a specific application from the passage, such as genetic testing or DNA evidence, and explains its importance.

12. A, B, C

Topic 10: Computational Science, AI, and the Future

Passage 37: The First Computers

1. B
2. (Open response)

   Sample answer: Integrated circuits, or microchips, are tiny chips that hold large numbers of transistors, allowing computing power to fit into a very small space.

3. B (False)
4. C
5. A, B, C
6. A
7. B
8. (Open response)

   Sample answer: Transistors were smaller, more efficient, and produced less heat than vacuum tubes, allowing engineers to build smaller, faster, and cheaper computers.

9. A (True)
10. D
11. (Open response)

    Sample answer: Answers will vary. A strong answer names a specific detail, such as room-sized computers or punched cards, and explains why it stands out.

12. A, B, C

Topic 10: Computational Science, AI, and the Future

Passage 38: The Internet's Early Beginnings

1. B
2. (Open response)

   Sample answer: Packets are small pieces of information that are broken apart, sent independently across a network, and reassembled at their destination.

3. B (False)
4. D
5. A, B, C
6. A
7. B
8. (Open response)

   Sample answer: It let people create and link pages using hyperlinks, making browsing feel more natural and easier for ordinary people than earlier technical methods.

9. A (True)
10. D
11. (Open response)

    Sample answer: Answers will vary. A strong answer names a specific development, such as packet switching or the World Wide Web, and explains its importance.

12. A, B, C

Topic 10: Computational Science, AI, and the Future

Passage 39: Artificial Intelligence: How Machines Learn

1. B
2. (Open response)

   Sample answer: Machine learning is a method where computer programs improve at a task by analyzing large amounts of data, rather than following explicitly programmed rules.

3. B (False)
4. D
5. A, B, C
6. A
7. B
8. (Open response)

   Sample answer: A traditional program would need explicit rules programmed in, while a machine learning system studies many labeled examples and learns patterns on its own.

9. A (True)
10. D
11. (Open response)

    Sample answer: Answers will vary. A strong answer connects to the passage's mention of using AI responsibly, such as questions about fairness or safety.

12. A, B, C

Topic 10: Computational Science, AI, and the Future

Passage 40: Robots and the Future of Technology

1. B
2. (Open response)

   Sample answer: Independent decision-making means a robot can make choices about its actions on its own, rather than only following a fixed set of instructions.

3. A (True)
4. D
5. A, B, C
6. A
7. B
8. (Open response)

   Sample answer: They use sensors to navigate around furniture and obstacles, cleaning a home automatically with minimal input from the owner.

9. A (True)
10. D
11. (Open response)

    Sample answer: Answers will vary. A strong answer names a specific role from the passage, such as home robots or medical robots, and gives supporting reasoning.

12. A, B, C
